ALUMINIUM R A N G E

Today's aluminium differs dramatically from that of the eighties & nineties. With slimmer frames and greatly improved thermal performance, it is not hard to see that aluminium is becoming the product of choice for windows and doors.

Aluminium has become the 'go to' for many architects and homeowners alike. Providing longevity, performance and amazing aesthetics, it is not hard to see why.

Whatever the style of your home, you can guarantee that the Flair range of Aluminium will not fail to impress.

Your Flair Retailer will advise you on the very best solutions for your home.

YOUR COMPLETE
ALUMINIUM WINDOW
& DOOR RANGE

Get the look you want

When choosing your windows & doors for your home you will want to choose products that not only look great when installed but ones that will continue to look incredible for many years to come.

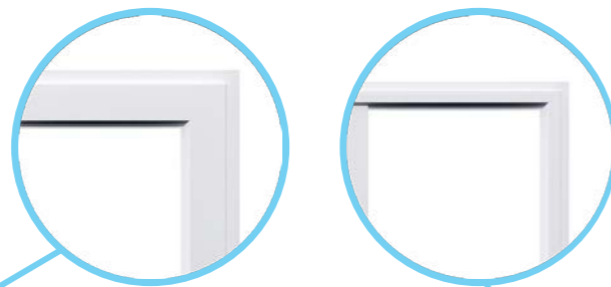

Slim window frames are a must have when trying to maximise the amount of natural light that enters your home.

When compared to the typical PVCu windows, the Flair Aluminium window frames are up-to 50% slimmer. This allows for the maximum amount of natural light to enter your home whilst giving an ultra slim appearance.

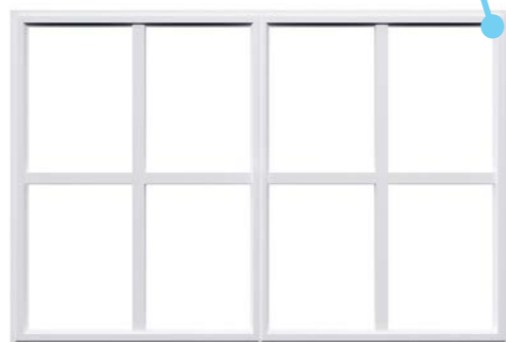

Slimmer Frames

These slimmer and stronger aluminium frames allow more natural light into your home as they increase the ratio of glass to frame. The clean joints and subtle lines offer an exceptional aesthetic finish.

Typical PVCu

Flair Aluminium

UPTO 50%
SLIMMER
THAN PVCU

High Strength

Aluminium, by its very nature, is a stronger material when compared to PVCu and unlike PVCu doesn't require any additional reinforcements.

Aluminium offers superior strength which allows for larger arrangements which, when using timber or PVCu, are only possible using bulky profiles and couplers.

Most PVCu bi-folding doors are limited when it comes to size allowing 750mm width per pane; Our Flair Aluminium Bi-folding Doors can accommodate panes up-to 1200mm wide allowing for uninterrupted panoramic views.

Security & Safety Features

Flairs Aluminium windows and doors have many security features as standard to help defend your home against even the most determined intruder.

All of the Flair windows and doors within the Aluminium range are put through stringent security checks. Our hinges, locks and handles are not only checked once, but time and time again.

In addition to these security checks, the product testing shows that these products are tested on an ongoing basis to make sure standards do not slip over time. The Flair Aluminium range has been rigorously tested to ensure they keep the wind and rain out of your home. An important consideration for windows and doors in the UK.

Our enhanced multi-point security locking systems, which are designed, developed and tested in the UK, offer homeowners security and peace of mind.

Each of our locks feature a combination of hooks and anti-lift bolts for enhanced security. Our windows have added protection to strengthen the hinges.

High security hinge guards are available on all of our Flair Aluminium windows and doors. This means that in the unlikely event of an intruder attacking the hinges instead of the locks, these devices prevent the door or window from being pushed/pulled open.

To help keep your family safe we offer restrictor hinges to prevent the risk of falls. These only allow the window to be opened partially which is important when fitting windows in a childs bedroom. These hinges have an override to allow for full opening in case of an emergency.

Single or Dual Colour

White continues to be the most popular colour choice for any window but with the introduction of bi-folding doors some homeowners are looking for a more flexible colour combination.

Our dual colour combinations allow you to keep the inside of your home a vibrant white, whilst creating a stunning modern look on the external features of your home.

Available Colours:

White

Black

Grey

Grey On White

Long-lasting Colour

Each Flair Aluminium product is powder-coated to give one of the most durable finishes that is available on the market for windows and doors. The colour process will not discolour, peel or rust which will keep the aesthetic appeal for longer.

Guaranteed to Last

The powder coated finish of Flairs Aluminium Range comes with our 'Superior Paint Guarantee' which guarantees against peeling, blistering, corrosion, fading and the loss of sheen.

Quality

Choosing the right window or door for your house can be a daunting experience. As can choosing the right company to install them. You can rest assured that all of our products are tested to the latest British Standards and will be installed to comply with the latest UK Building Regulations.

This independent testing combined with our reputation means that the only thing you need to worry about is deciding on the look and style of your windows and doors - the performance and quality comes as standard.

Building Regulations

When it comes to selling your home, you must be able to demonstrate that all of your windows and doors are fitted to follow building regulations. This is done by producing a certificate of compliance from either an approved installer or your Local Authority Building Control Department.

All of Flairs professionally manufactured windows and doors comply with building regulation requirements for new build, replacement and refurbishments.

Thermal Barrier Technology

The Flair Aluminium window and door range is enhanced with polyamide thermal barrier technology. This enables the windows and doors to exceed the energy performance requirements of current UK Building Regulations

The polyamide thermal barrier aids in reducing heat loss and enhancing the overall U Value of the product which allows Flairs Aluminium windows to achieve high energy ratings.

Flairs Aluminium Range uses materials that have a very high resistance to heat transfer from the inner face of the frame to the external face of the frame. This gives greatly improved thermal efficiency and reduced condensation.

Energy Ratings

Low Iron

Low iron glass is extra clear and will allow a greater degree of solar heat gain making homes feel warmer without turning the heating up.

Low-E Glass

Low-E glass is a clear glass with a microscopically thin coating of a metal oxide that allows light and heat from the sun to pass into the building while at the same time reflecting heat back in rather than letting it escape.

Solar Control

This 'anti sun glass' reflects over 60% of the sun's solar energy which helps control the amount of heat entering the home through the glass. This is very advantageous for conservatories and large glazed areas such as sliding patio doors as it helps keep your home cooler in the summer.

ACHIEVE OPTIMUM ENERGY EFFICIENCY

Make your room an all year round living space

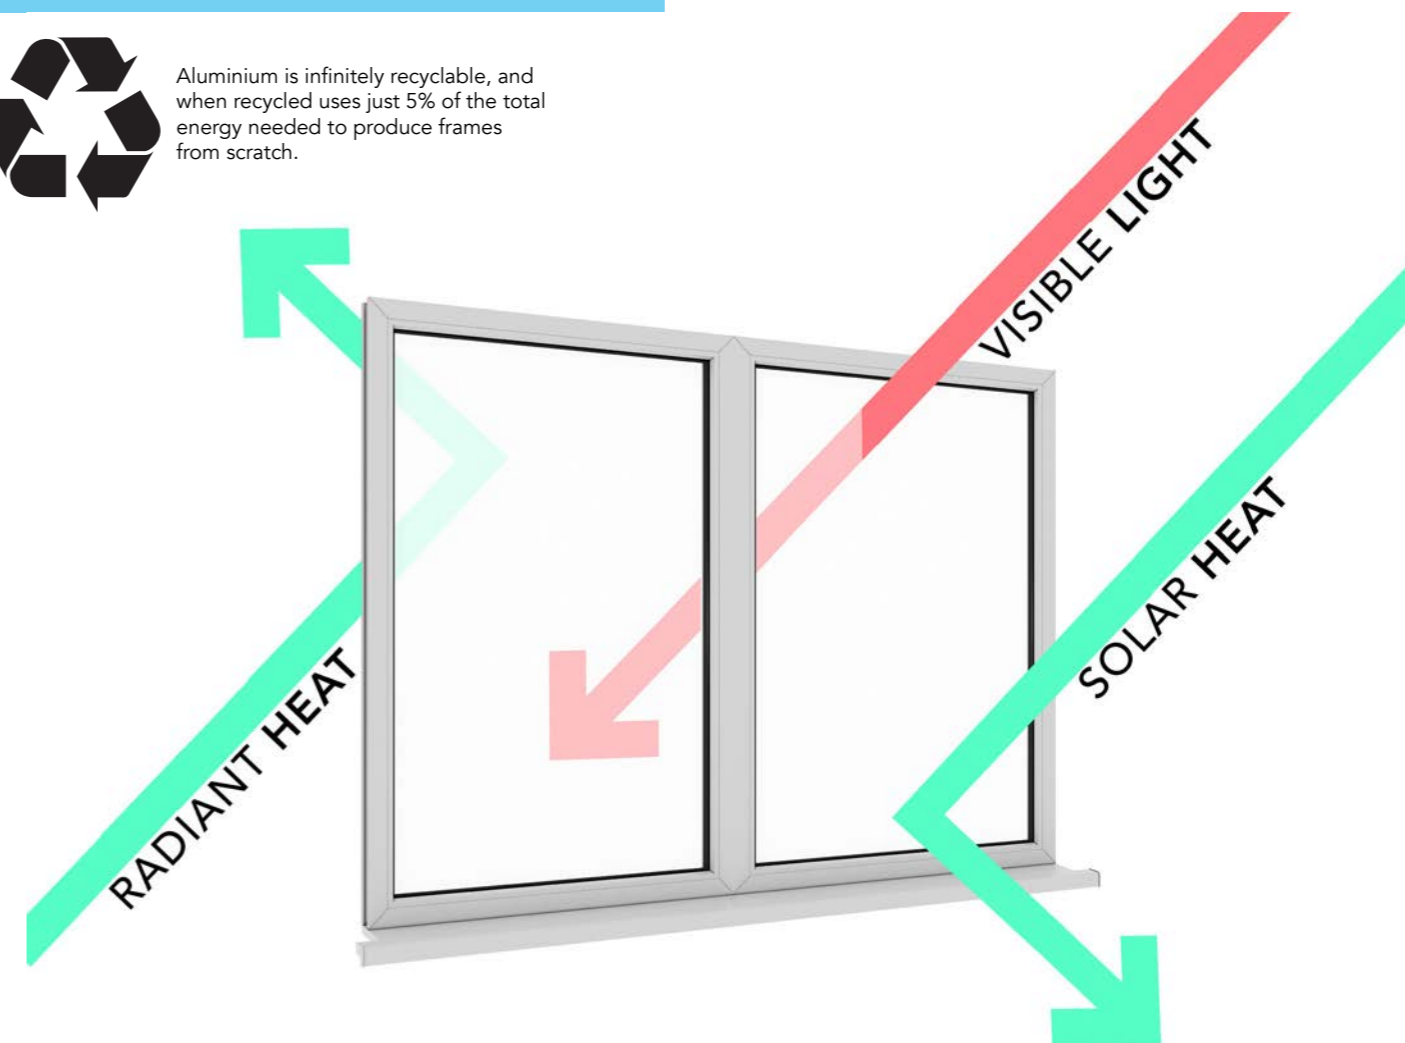

The main goal is to let visible light in, whilst keeping solar heat out in the summer and radiant heat in during the winter.

With energy bills rising, thermal efficiency remains the number one priority when making home improvements.

Flairs Aluminium range has been designed and engineered with this in mind and our thermal performance give superior thermal efficiency. Whether building an extension or simply renovating a room, you can be certain of creating an all year round comfortable living space with Flair Aluminium.

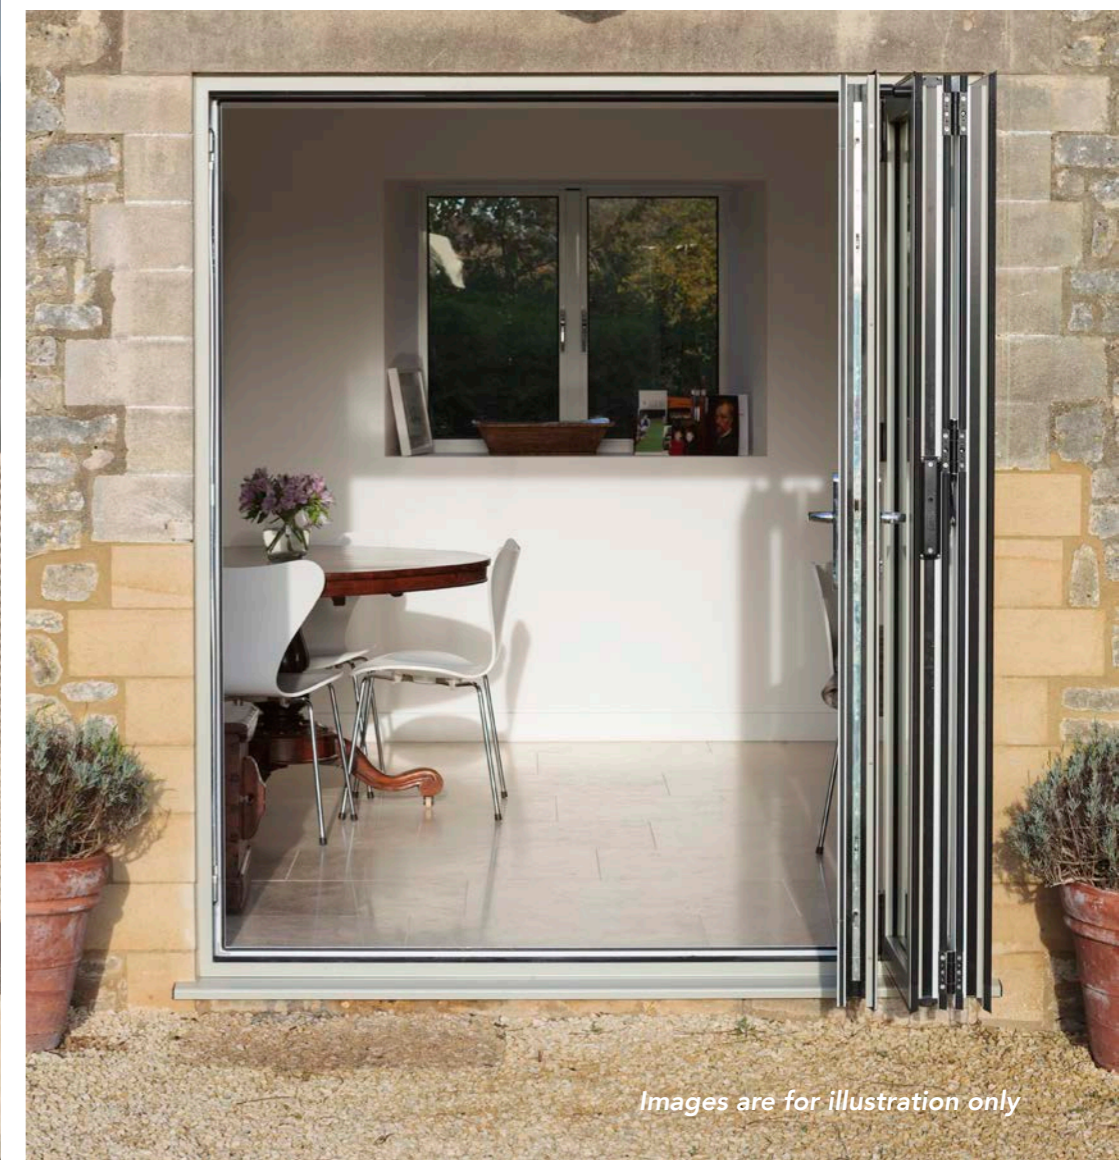

Aluminium is infinitely recyclable, and when recycled uses just 5% of the total energy needed to produce frames from scratch.

YOUR COMPLETE ALUMINIUM WINDOW & DOOR RANGE

Suitable for all property types from traditional cottages to contemporary town houses.

Images are for illustration only

We don't believe that one style suits all, which is why you have the choice of styles and finishing touches - tailor your options to suit your home

TAILOR MAKE YOUR LOOK

With a range of colour combinations for your doors, windows and accessories there are almost endless possibilities of what look you can create.

CASEMENT WINDOWS

From a traditional country cottage to a contemporary town house, the Flair Aluminium Range of windows offers style and elegance to suit all tastes.

Our ultra-slim frames allow for more natural light to enter your home whilst giving the best views to the outdoors.

Flair Aluminium Windows are bespoke to your home ensuring they fit perfectly. Each window is manufactured using the latest technologies and processes allowing us to create the finest finish.

Square Contemporary

The square edged flush appearance of the 'Contemporary' window option provides a clean, modern finish to any home.

Its appearance complements Flairs Bi-folding door range to help give your home that aesthetic appeal. With a range of colours to choose from these windows can really transform your home.

Dummy Sashes

Window styles that have a combination of opening and fixed areas can look uneven due to frame design.

Dummy sashes allow you to balance the sight lines and create a uniformed look.

Exterior Design

Interior Design

Easy Clean Hinges

Our easy-clean hinges allow you to slide your window open on the one side giving easier access to clean both sides of the glass from inside your home. These hinges open to almost 90° giving you an unobstructed view and creating an easy fire exit.

Handles

Our hardware is available in a choice of colours and finishes giving you the option to tailor your windows to suit your interior.

BI-FOLDING DOORS

Bi-fold doors offer a choice of opening configurations to suit your needs

- Fold the doors in or out
- Slide all doors to one side to create a large open space
- Create a single entrance for easy access and have the remaining doors slide the opposite way
- Part the doors centrally to create a double door

Available Colours:

White

Black

Grey On White

Special Colour

Flair Aluminium Bi-folding doors give exceptional panoramic views all your round from the comfort of your home. The Flair aluminium Bi-folding doors allow quick and easy access to your garden by neatly folding and sliding.

The large panes of glass allow maximum light into your home and give unspoilt views of the outside.

Your tastefully designed and carefully manufactured doors are easily matched to the style of your home and provide a seamless transition between indoor and outdoor space.

Choose from panes up-to 1200mm wide and 2580mm high. These can be designed to fit any opening size. Your Flair retailer will give you advice on the most suitable option for your requirements.

Slim. Strong. Smooth

The high strength of aluminium ensures that the Flair Aluminium Bi-folding Doors are one of the strongest available.

The Flair Aluminium Bi-folding Door frames and its mechanisms give optimum strength and durability to ensure it is a structurally sound product that requires minimal maintenance over its lifetime.

Our doors run on stainless-steel rollers at the base of the frame. As the entire weight of the door is taken by these rollers and the smooth running of your doors depend on them, we ensure that they are of the highest quality. Thanks to these special rollers even the widest of doors can be opened with minimal effort.

Magnetic Door Catch

The Flair Bi-folding door leaf is held open by a round magnetic catch which is attached to the folding doors, holding the doors open as they fold.

Chrome White Grey Black

Threshold

Our threshold options allow you to choose from a floor to floor threshold, all the way through to a traditional step which provides maximum weather rating for extreme conditions. When a flush doorway is required, for example separating two rooms or for wheelchair access, our low threshold option allows for a smooth transition.

Multi-Point Locking

Flair Aluminium Bi-folding Doors feature two high security hooks and a dead-bolt to ensure total peace of mind.

Trickle Vents

In certain circumstances your local Building Regulations will require you to have ventilation slots in your window or door frames to allow your home to 'breathe'. Your Flair retailer will advise you on the options available and the requirements.

Handles

No matter how many handles and locks you have on your Flair Aluminium Bi-folding Doors, you only ever need to find one key as your door set has 'keyed alike' locks as standard for your convenience.

Hardware is available in a choice of finishes to allow you to tailor your doors to suit your interior.

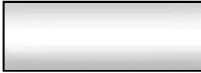

Handles

When creating a stylish home, details can be everything. The handles that are available throughout the Flair Aluminium range offer every home a matching suite of high quality products. All of our handles have been tested to ensure high standards of endurance and functionality.

Use our reference chart below to discover the perfect set of handles for your home.

Locks

Flair Aluminium doors that have more than one lock will only require one key to open all of them. This is called a 'keyed alike' system. Separate doors will have unique keys unless specified. When you specify for a high-security key system (3 Star System), all keys will be unique. For more information please speak to your Flair retailer.
